

Keeping The Green Planet safe in Dubai

Overview:

Seven storeys tall and encased in glass, the tropical world housed within The Green Planet, Dubai, invites tourists, school trips and curious locals to sample life within a living, breathing rainforest – all just miles away from the comforts of regional landmarks such as the Dubai Mall and Four Seasons Resort.

Outcome:

Working with main contractor Orascom Construction Industries and MEP contractor Habtoor Leighton Specon, Adexsi was appointed to assist with the provision of smoke control systems to the building, ensuring that visitors and staff are kept safe at all times while being sure not to interfere with the robust environmental control systems used to keep the plants and animals comfortable.
