

Bentley Motors – Engineering Building

Overview:

Adexsi UK have undertaken Design, Supply and Installation of 296m² of Fixed Blade Architectural Louvres at the New Engineering Building in Crewe.

Outcome:

Adexsi UK worked with Main Contractor Goldbeck Construction to provide AdeShade® Shield FL700 extruded Aluminium Louvre system complete with insect protection. The system provides a sleek shadow line along 2 facades in contrast colour as it is integrated with the Goldbeck cladding system. Works are progressing and the Louvre cladding installation should be completed shortly.
