

Bristol Royal Infirmary

Overview:

BAM Construct UK are working on improvements to the GICU project at University Hospital Bristol and Weston, providing much needed ICU isolation rooms, drug stores and clinical areas.

Outcome:

During the works, Adexsi UK in collaboration with T Clark and BAM have designed supplied and installed a 16.2kWp Solar PV Array. Using Q Cells 405w panels and 17kW Rayleigh Inverter the AdeSolar® system will help in monitoring and securing the Trusts energy needs.
